## Exciting People & Events

### Vocational tips:

Each newsletters contains a tip that comes from one of our areas of vocational concentration. This could be automotive, culinary, health occupations, cosmetology, welding, drafting, entrepreneurship, fire science, child care, residential wiring, building trades, graphic communications, or machining.

### Career Center Happenings:

Look for details of events and learning experiences that have, or will occur at the ACC. These might be an entire class, or an individual student. At least once a month, events will be spotlighted for you to share in the experiences of the students.
